## Fleet & Servicemanagement

### VENDOR-INDEPENDENT FLEET MANAGEMENT

- Support of all devices from all manufacturers
- On-Premises or Cloudbased
- Monitoring and comprehensive service control
- Open system for any ERP connections
- Fully integrated cost center evaluations

### INSTALLATION AND MAINTENANCE

- Self learning & maintenance free system
- Auto roll-out and update of the acquisition clients
- Optional AD coupling with transfer of user roles
- Worldwide automated MIB updates
- Interface to any asset systems

### PUBLIC & PRIVATE MIBS

- Evaluation of all Public & Private MIBS of all manufacturers for additional device information
- Central maintenance of all device MIBs of all manufacturers by docuFORM
- Evaluation of all MIBs already on site guarantees very high system performance
- Daily, automated MIB update in the field

### ACQUISITION VIA SMARTPHONE APP

- Ideal for environments with few devices
- Fill level display directly in the app
- Also for environments without Microsoft systems
- Available for iOS and Android
- Customer networks are not opened
- Order of consumables via App (in preparation)

For further information, see:

**Mercury** Suite

# SERVICE-INFO-APP FOR MFPs

- Order information directly on the device display
- Notification of service calls or faults
- Relief for service helpdesks
- Interface for ERP status feedback
- directly into the app in real time
- Customer networks do not need to be opened

## INTERFACES FOR ERP CONNECTION

- Interfaces to renowned ERP systems already available
- Simple web based programming interface for bidirectional data exchange
- bidirectional XML / RPC interface for arbitrary connections

## ORDER STORE MODULE AS INTEGRATED ERP SYSTEM

- Database with all manufacturers of VB materials
- Import possibility for any VB information such as coverage, costs, etc.
- Interactive order suggestion list with alternatives for the user
- Integrated supplier feedback for status information

## INTEGRATION OF DIFFERENT MANUFACTURER PLATFORMS

- Support of HP Smart Device Services (SDS) 2.0
- Connection to Kyocera KFS
- All additional manufacturer information remains in the docuFORM MPS system
- Secured data communication

## SOFTWARE MADE IN GERMANY

- Development in Germany guarantees optimal Service and individual support
- Secure communication via REST-API and OAuth2.0 - no opening of customer networks
- Hosting in the in-house data center possible
- Further development in partnership through implementation of customer requirements
